

NextGen SAI Cooperation in the Digital Age

**To: Auditors General and Heads of Supreme Audit Institutions (SAIs),
Participants of EUROSAI High-Level Conference on Inclusiveness**

Subject: Strategy Paper

Presented by: Audit Chamber of the Republic of Armenia

Date: 10-11 March, 2026

EUROSAI High Level Conference on Inclusiveness
Prague, 10-11 March 2026 (hybrid format)

The Core Challenge

The Velocity Gap

Accelerating Transformation

- Public sector digital adoption is growing exponentially, outpacing traditional oversight methods

The “Time Lag”

- Traditional, siloed audit planning creates a significant gap between policy implementation and effective oversight

Shadow IT Risks

- Subject Matter Experts are resorting to insecure, unauthorized platforms for advice due to lack of official channels

Our Invisible Assets (The Unutilized Potential)

We Are Sitting on a Gold Mine of Knowledge

Expertise Silos:

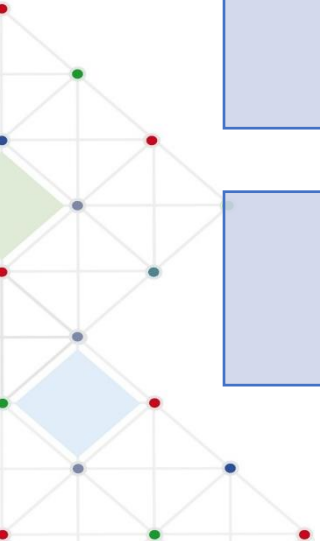

- Valuable data scripts, audit skills, and specialized knowledge are currently trapped within single unit, inaccessible to the others

Regional Blindspots:

- Multiple SAI's are auditing identical high-stakes topics (e.g. AI regulation, Green Finance) in complete isolation, duplicating effort and missing cross-border insights.

Latent Talent:

- A new generation of digital-native auditors possesses advanced skills but is stifled by 20th-century tools and rigid hierarchical communication structures.

The Proposed Ecosystem: The Tiered Architecture

Balancing Security with Agility

Formal **The Vault**

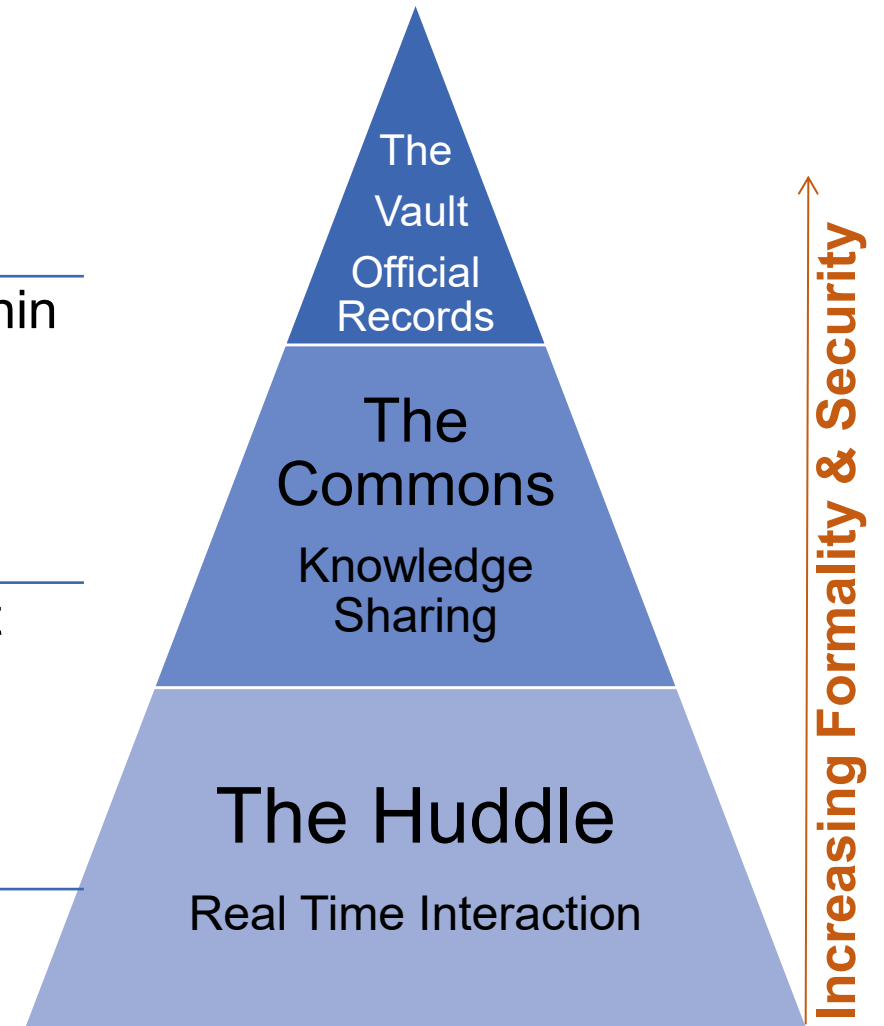

- The official repository for finalized records protected within national jurisdictions and institutional confidentiality standards

Semi-Formal **The Commons**

- Space to share practices: libraries vetted for sharing but non-disclosable to the general public

Informal **The Huddle**

- Agile communication for quick queries and collaboration via individual credentials

Strategic Advantages: Striving for Excellence

Beyond "Modernization" – A Competitive Edge

Audit Velocity

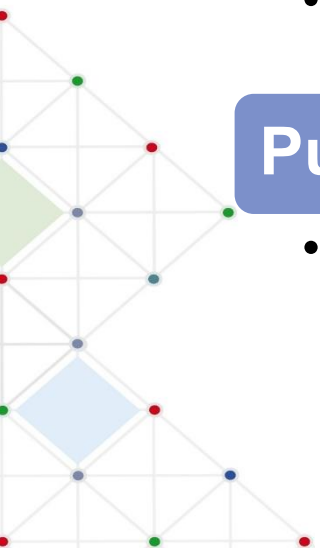

- Move from reactive to "Agile Oversight", delivering insights while they are still actionable

Institutional Resilience

- Knowledge stays in the organization. Institutional "inheritance" is preserved in the "Vault" even when key staff retire

Public Trust

- Demonstrating fluency in digital collaboration increases SAI credibility with modern stakeholders

The Cost of Inaction

The Risks

Diminishing relevance

- In a rapidly moving digital state, slow audits become irrelevant history lessons rather than actionable oversight

Intellectual Property Leakage

- Without secure official channels sensitive information leaks into insecure “Shadow IT” platforms.

Loss of the "Talent War"

- High-skilled digital auditors will not remain in an organization stifled by 20th century tools and barriers

Addressing Leadership Concerns

Security, Hierarchy and Control

Data Sovereignty

Secure Infrastructure

We leverage “sovereign clouds” to ensure all sensitive audit data maintains strict national residency compliance, addressing concerns about cross-border data leakage

Control

Process Integrity

Digital tools act as a "Conveyor Belt" that reinforces existing approval workflows rather than replacing them, ensuring oversight remains with leadership

Strategic Focus

Efficiency Gain

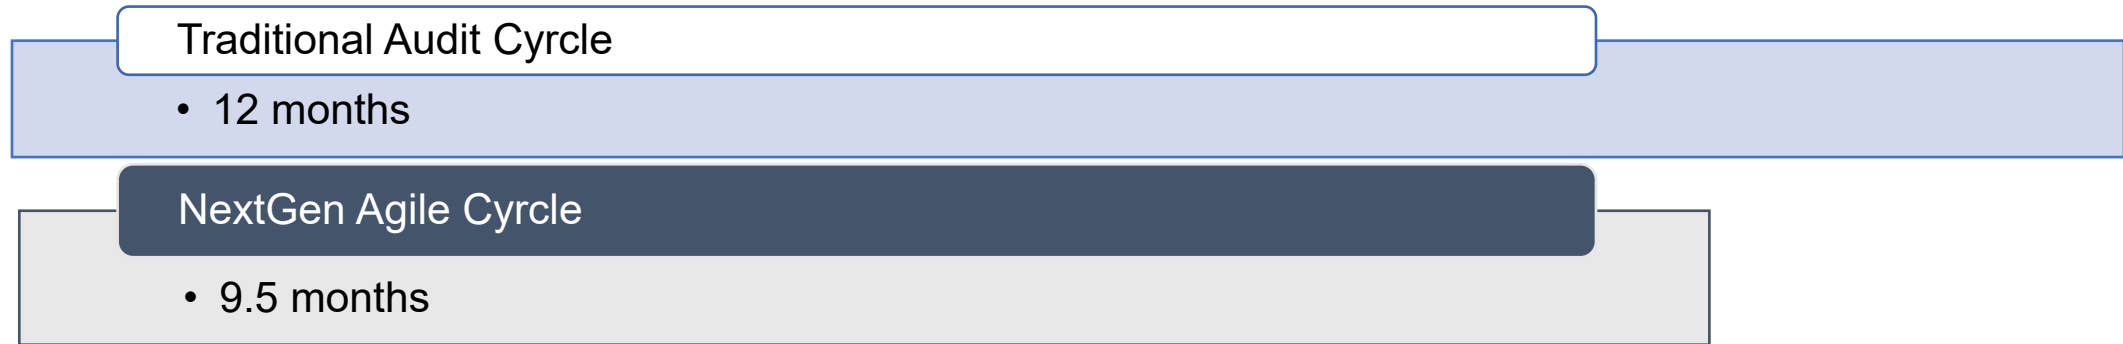

AI-driven summarization and filtering prevent information overload, delivering only relevant, high-priority insights to decision-makers

Impact Analysis

Audit Lead Time 20% Reduction

The Recommendation (The "Go/No-Go" Moment)

Approval for the 6-Month "Digital Commons" Pilot

Charter Pilot Team

- Assemble a cross-functional team of digital natives and experienced auditors to lead the initiative

Implement the "Tiered Architecture"

- Deploy the three-layer ecosystem (Huddle, Commons, Vault) for a specific thematic group, such as IT Audit

180-Day Review

- Evaluate success against KPI's using a dedicated dashboard

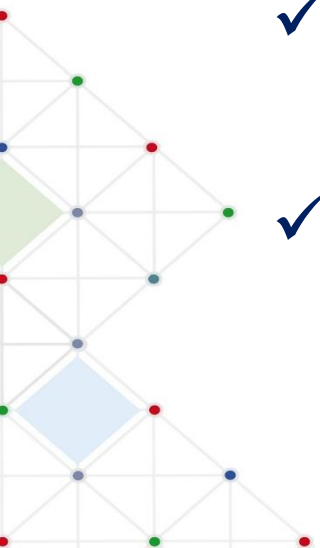

Conclusion

Shaping the Future of SAI's Cooperation

Let us bridge the gap between our potential and our performance and cover all 3 dimensions of inclusiveness:

- ✓ **Generational Inclusiveness:** Engaging digital natives
- ✓ **Resource Inclusiveness:** Bridging the gap between advanced and developing SAIs
- ✓ **Intellectual Inclusiveness:** Ensuring regional breakthroughs reach a global audience.

THANK YOU FOR YOUR PATIENCE AND

**Let us shape the future of SAI's Cooperation
and cover all 3 dimensions of inclusiveness**

Q&A

EUROSAI High Level Conference on Inclusiveness
Prague, 10-11 March 2026 (hybrid format)
